WORK EXPERIENCE

Data Science Intern

Devsinc | City: Lahore

[08/2024 – 10/2024]

Where I gained practical experience in machine learning, data analysis, and AI-driven solutions. During my internship. I worked on projects involving data preprocessing, EDA, model development and model deployment

AI/ML Trainee

NetSol Technologies | Lahore | 03/2025 – Present

Currently undergoing a structured 12-week AI/ML training program covering Basic python, libraries(NumPy, pandas, Matplotlib, Seaborn, scikit-learn),data preprocessing, EDA, Data distribution, machine learning, GitHub, model deployment, FastApi's, Flask, Streamlit, NLP, RAG and GenAI.

EDUCATION AND TRAINING

Bachelor of Science in Artificial Intelligence

University of Wah [10/2021 – 08/2025] | City: Wah Cantt

PROJECTS

Medical RAG Chatbot

Built a medical question-answering chatbot using Retrieval-Augmented Generation (RAG). The system retrieves relevant medical documents from a vector database and uses an LLM to generate accurate, context-aware responses for healthcare queries.

Technologies: Python, LangChain, FAISS, Gemini API, Streamlit. And deploy on Google Cloud (Cloud Run) for public access

Link: <https://medical-rag-chatbot-833258879596.asia-south1.run.app>

BMI Calculator using logistic regression

Developed a machine learning model to classify BMI categories using height and weight data. Trained a Multinomial Logistic Regression model on a dataset of 500 individuals, achieving around 85–90% accuracy. Implemented data preprocessing and feature scaling, and built an interactive Gradio interface for real-time BMI category prediction.

Technologies: Python, Logistic Regression, Pandas, NumPy, Scikit-learn, Streamlit and Flask (both)

MLask chatbot

Built a Retrieval-Augmented Generation (RAG) system that retrieves relevant documents from a knowledge base and uses a Large Language Model to generate accurate, context-aware responses, improving reliability and reducing hallucinations.

Technologies: Python, LangChain, Vector Database, Embeddings, Large Language Models (LLMs), Streamlit.

SKILLS

Technical Stack

- **Programming Languages:** Python
- **Programming Frameworks:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
- **Technologies:** Hugging Face, LangChain, GitHub, Google Cloud, Streamlit
- **Backend Frameworks / APIs:** FastApi's, Flask
- **Core Competencies:** Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Model Development, Model Evaluation, Retrieval-Augmented Generation (RAG) and model deployment
